Education

Instituto Tecnológico de Morelia

Computer Systems Engineer - Specialization in Software Engineering

Morelia, Michoacán

Expected July 2026

Experience

Software Engineer

Ideapp S.A. de C.V.

Remote

January 2026–June 2026

- Refactored sales logic into modular functions, reducing code length by 60% to improve system maintainability.
- Integrated Openpay payments using a standardized pattern to handle errors accurately across 10+ API responses.
- Optimized database queries to resolve crashes during bulk registrations, increasing system stability and speed.
- Created automated Excel tools to import and export thousands of records while ensuring data integrity for malformed inputs.

Full Stack Developer

Freelance Partnership

Remote

July 2024–December 2024

- Built Python tools using Discord and Slack APIs to automate data extraction, saving clients hours of manual work by centralizing information.
- Launched web services for 3+ e-commerce clients using Flask and Express.js, resolving data bottlenecks and improving inventory tracking.
- Deployed 15+ projects via Docker and Google Cloud, ensuring high availability and seamless updates for diverse clients.
- Served as Technical Lead, managing the full development lifecycle and version control via GitHub to ensure 100% on-time delivery.

Projects

Smart Lunch Management Platform (React, Django, AWS S3, PostgreSQL) · smartlunch.mx

Comprehensive cafeteria administration system currently implemented and used by an active base of 38 schools to manage high-volume operations.

Dynamic Restaurant Website (React, Django) · revolucionarios2.vercel.app · github.com/M0ORI/los_revolucionarios

Full-stack client platform developed via Scrum methodology to provide dynamic data management and real-time updates.

Pokédex Explorer (React) · poke-api-full.vercel.app · github.com/Gerts18/PokeApi

API-driven interface using centralized state management to aggregate multiple requests into a single data object.

Skills

Programming Languages: Python, TypeScript.

Tools: Git, AWS, Figma, Google Cloud, Docker, Node.

Frameworks: Django, Flask, React.js, Express.js.

Databases: PostgreSQL, Firebase.

Project Administration: Jira, Trello.

Soft Skills: Assertive Communication, Teamwork, Responsibility, Critical Thinking.
